Releasing Tools

Used for the non-damaging removal of various contact systems from their housings.

Original Zebra® releasing tools are developed in close co-operation with the contact part manufacturers and are manufactured with the best quality possible. Damage to the housing or contact and thus any associated costly downtimes are ruled out!

Locking blade guard for protection of blades and to prevent injuries.

Blades made of high-strength materials.

Easy to manage handle, excellently suited for sensitive work with filigree plug connections.

Universal Assortment
Utility Vehicles / Buses, 19-piece

- **Covers approx. 80 - 90% of all applications for the utility vehicles/buses.**
- Storage option for 4 additional releasing tools.
