PARTS CLEANER
Environmentally friendly parts cleaning for plant and motor vehicle workshops.

The system – a new dimension in parts cleaning
- Cleaning device for environmentally friendly, economical parts cleaning.
- Cleaning liquid for cleaning soiling of tool and machine parts with oil and grease based on fatty acid esters with active cleaning power.

The device – PARTS CLEANER
Your advantages:
- Simple, user-friendly operation.
- Stable, rugged lower device section.
- Large, lockable cleaning basin with high load-bearing capacity.
- Insulated, double-walled tank.
- Sturdy cleaning brush for mechanical cleaning of heavily soiled parts.
- Flexible jointed hose with flat nozzle for rinsing off parts.
- Operating hours meter for detecting maintenance intervals.

The cleaner – PARTS CLEANER LIQUID
Your advantage:
- Complies with the specifications of the German Solvent Ordinance according to 31st BlmSchV (Federal Emission Protection Ordinance).
