

ALUMINA ZIRCONIA LINISHING BELTS

High tear resistant belt with high stock removal rate for working on steel and stainless steel.

- High edge stiffness.
- Suitable for steel, stainless steel and steel alloys.
- Alumina Zirconia Grain.
- Resin bonding agent.
- Semi-open coating.
- Abrasive cloth, waterproof backing.

Design – zirconia alumina.

Rugged polyester cloth with grain size of 40-80; rugged yet flexible cotton cloth with grain size of 100 and 120: High resistance to tearing

Fully synthetic resin bonding with grinding additives.

Long service life and cool sanding

Application area:

De-burring, edge breaking, grinding smooth weld seams and joints in difficult to reach areas. Surface grinding of soldered and welded points on steel.

Notice:

Belts are directional. Please follow arrows on back of belts when using.
