Details/Application

For easily bonding plastic parts or repairing lamp housings, for example.

Instructions

The substrate must be capable of bearing loads and must be clean, dry and free from grease and rust. Old adhesive residues must also be removed. Observe the processing instructions. For more information, refer to the technical data sheet.

Notice

Not suitable for PE (polyethylene), PP (polypropylene) or PTFE (polytetrafluoroethylene). There may be adhesion problems in individual cases due to the coatings and release agents used in some cases in the plastic production process. Check material compatibility on a non-visible area if necessary.

The usage instructions are recommendations based on the tests we have conducted and our experience; carry out your own tests before each application.
