

KNEE PADS PROFI

Art. No.	0899 030 10
P. Qty.	1
Material	Polyurethane
Material of the fastening strip	Chloropren
Colour	Black
EN standard	14404
Number of pieces	1 Pair

For universal use for all kneeling tasks

Certified in accordance with DIN EN 14404

Abrasion-resistant PU surface, very non-slip

Very comfortable

- The pad adapts to the shape of the knee within a short period of time
- Low weight (approx. 250 g/pair), lightweight and safe

No one-sided strain or cutting the hollows of the knees

Thanks to chloroprene straps with universally adjustable, high-quality hook-and-loop fasteners.

Maximum damping despite low material thickness thanks to a 12-mm-thick sandwich design

High-quality material

- 3-mm-thick, waterproof chloroprene stores heat and protects joints and muscles from the cold
- A hard-wearing LYCRA® coating prevents heavy sweating and is quick-drying. The pads can be worn directly on the skin
- All seams are sewn with elastic thread and are thus extremely resilient yet flexible

Application area

Ideal e.g. for tilers, electricians, roofers, scaffolders, construction workers, metal-workers, installers, mechanics, gardeners
