

Air conditioning evaporator cleaner Step2_Clean

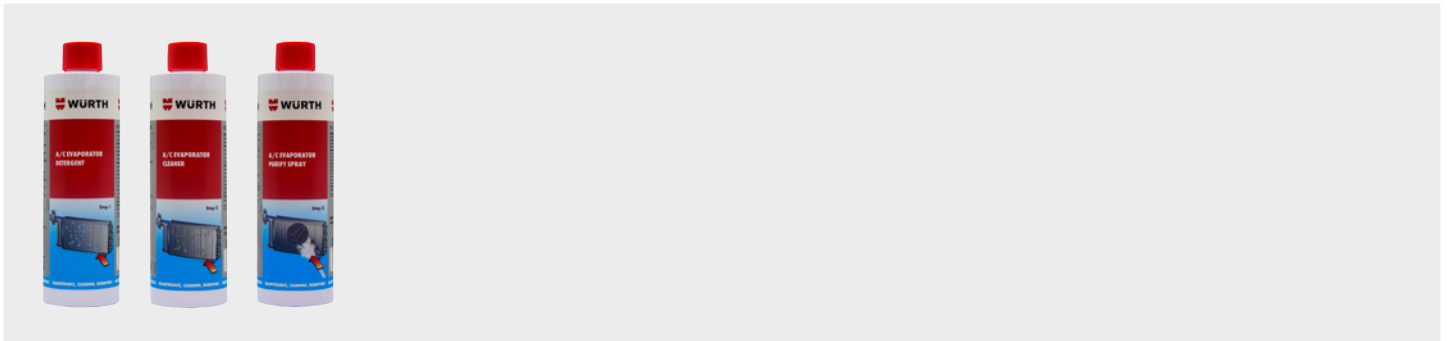

Unique formula to make the evaporator aluminum radiant bright

- Further remove dirt rinsing step when removing oxidation residue
- Make the evaporator aluminum radiant bright again
- Real-time cleaning inspection of the narrow parts with 360° high efficient decontaminations
- Product safety, non-toxic

Details/Application

Cleaning and care of vehicle air-conditioning systems.

Instructions

- Switch off the air conditioning system and the ventilation, pour evaporator cleaner into the container, assembly it on the Endoscope Spray Gun | Art. no.: 0891 764 009
- Insert the spray probe into the condensate drain, then start to spray for approx. 30 seconds.
- Allow substance to act for at least 10 minutes before starting up the air-conditioning unit.
- Loosened dirt will escape easily via the drain.
- The borescope's NDT video helps to realize real-time cleaning inspection of the narrow parts.

Notice

Do not apply to hot surface or in direct sunlight. Keep away from children.
