

## Radiator sealant For all engines with cooling systems without filter systems

### Permanently seals hairline cracks and leaking areas

Secures the function of the cooling system against water loss.

### Avoids loss of coolant

Protects the engine from being damaged.

### Does not affect the materials used in the radiator construction

Does not attack rubber or plastic parts.

### 300 ml is sufficient for 10 litres of coolant

Contents	300 ml
Colour	Green, Blue
Smell/fragrance	Fruity
Chemical basis	Ethylene glycol
Shelf life from production	24 Month

### Art. no. 5861 501 300

P. Qty.: 1 / 12

### Details/Application

Seals hairline cracks in radiator, engine block or cylinder head. Leaking hose connections can also be sealed. Permanent sealing of hairline cracks and leakage points protects the cooling circuit and combustion chamber from leaks. Radiator sealant prevents loss of coolant.

### Instructions

Shake the can well before use. Add the contents of the can to the warm cooling system. Open the radiator valves and let the engine run for at least 10 minutes. Check the coolant level and leak tightness again. In trucks, use a mixing ratio of maximum 1:100.

### Notice

Radiator sealant must not be used if the cooling system is equipped with a dirt strainer.

The usage instructions are recommendations based on the tests we have conducted and based on our experience; carry out your own tests before each application. Due to the large number of applications and storage and processing conditions, we do not assume any liability for a specific application result.
