

Basic zinc protection Zink spray, light

Additional barrier protection from zinc flakes

- Cold galvanising
- Protects against rust
- Abrasion-resistant
- Spot-weldable
- Cathodic corrosion protection

Details/Application

Suitable for repairing damage due to machining and rusty areas on galvanised parts and steel structures. Ideally suited for a high-quality metal primer.

Notice

Store in a dry place and at room temperature (15 - 25°C), minimum shelf life two years.
