

Adhesive Lubricant Synthetic ACP

Highly adhesive, pressure resistant synthetic anti-corrosive composite

- Excellent capillary action upon initial application allowing product to penetrate into the smallest of gaps.
- After a few minutes the solvents evaporates leaving a highly adhesive waterproof, load bearing film.
- Provides long lasting protection against corrosion.
- Synthetic ACP provides excellent wear/tear friction resistance on high pressure loads, impact and vibration.
- Resistant to salt water, weak acids and alkali.

Spray Can

Details/Application

Hinges, bolts, lock, joints, pinions, bowden cables, sliding rails, rollers, drive chairs, etc
