

Packfix packing film

For fast packing without cutting or adhesive residues

- When removing film from the product, no adhesive residues are left behind
- Corners, edges and curves etc. can also be packaged and/or protected quickly and reliably with the film. This also means considerable time is saved.
- The film can easily be torn off by dragging on the protruding section of the winding core. As a result, no extra cutting tools are required to cut the film.
- Recyclable PE film

Material	PE - Polyethylene
Conditions for pressing pressure	with eight wrappings
Max. temperature resistance	50 °C
Chemical resistance	Application-dependent, query required
Shelf life from production	24 Month
Conditions to maintain shelf life from production	dry storage area, 20°C

Art. no.	0992 900 220	0992 900 1	0992 900 2
P. Qty.	6	10	6
Colour	Black	Transparent	Transparent
Width	500 mm	100 mm	500 mm
Length	270 m	150 m	270 m
Foil thickness	20 µm	23 µm	20 µm
Stretch capacity	200 %	550 %	470 %
Min. pressing pressure	0.7 N/mm ²	1.2 N/mm ²	0.7 N/mm ²
Ultraviolet resistance	6 months	No	No

Details/Application

For packing, bundling, protecting, securing, safeguarding load units and as moisture and theft protection. Universal usage for a wide variety of packaging goods such as packages, pallets, wood and plastic profiles, carpet rolls, picture frames, other long goods etc. Packfix has also proven its worth in relocation applications such as for sealing cartons, protecting furniture pieces and securing drawers against opening. Packfix 100 mm is also particularly suitable for steering wheel protection in the automotive industry

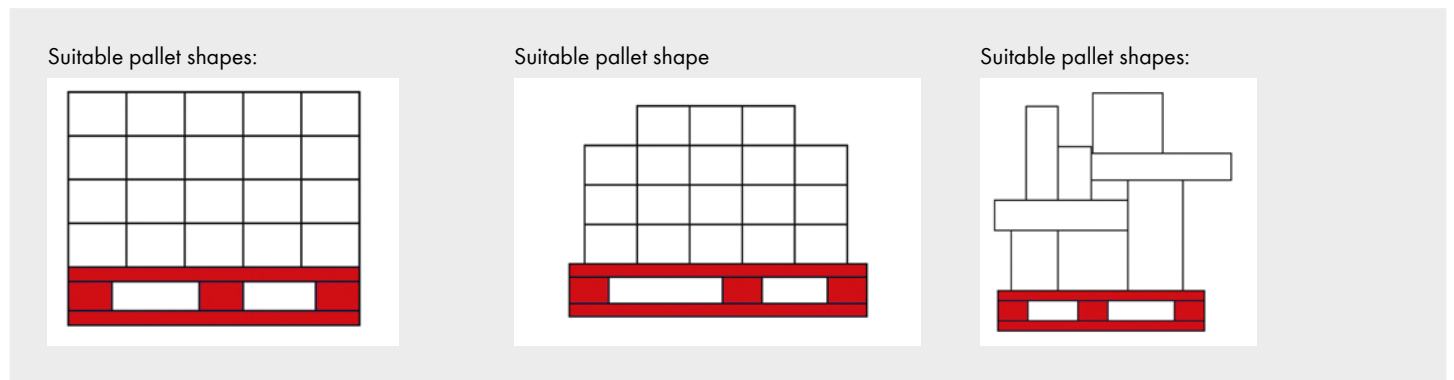

Instructions

Please refer to the technical data sheet for information on correct application.

When securing pallets with Packfix for load units, it is essential to pay attention to the foot windings. A good connection between the load carrier and packing material is essential for good load unit securing.

Notice

A different handle must be used for the 500 mm film than for the 100 mm film.
